

# PUMP SPECIFICATIONS

Lanark's spa jetting configurations have been uniquely designed to operate with the range of Onga high performance hydro pumps. All Onga pumps supplied operate on 10 Amp power supply.

All Onga pumps are:

- energy efficient
- whisper quiet
- suitable for indoor or outdoor mounting without the need for a cover
- approved to Australian / New Zealand standards
- covered by a seven year manufacturer's warranty

## ELECTRONIC HOT PUMP WITH TOUCH PAD

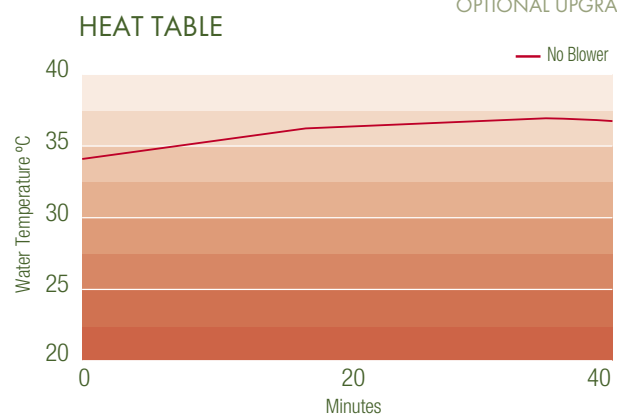

OPTIONAL UPGRADE 2

- gives you the option of turning the heater element on and off, while leaving the pump operating
- dedicated heating element located in the Full-Flo of water
- maximises the bath water temperature and also maintains the temperature of the water when blower is activated
- will raise the temperature of the water 2.5°C per hour when blower is off

## GENUINE DEDICATED HOT PUMP

- dedicated heating element located in the Full-Flo of water
- maximises the bath water temperature and also maintains the temperature of the water when blower is activated
- will raise the temperature of the water 2.5°C per hour when blower is off

## STANDARD PUMP

- maintains the temperature of the water for approximately 20 minutes.
